Profile

Motivated AI and Robotics undergraduate pursuing a bachelor's degree under a 100% merit-based scholarship. Proficient in Python (NumPy, Pandas, Matplotlib), SQL, Microsoft Fabric, and Power BI, with a strong interest in data analytics and AI-driven solutions. Adaptable, detail-oriented, and eager to apply technical skills in real-world projects.

Work Experience

(09/24 - present)

Personal / Academic Projects - Uzbekistan

• Analyzed and processed structured datasets using Python (NumPy, Pandas) to extract insights and trends.
• Built interactive dashboards and reports using Power BI to visualize key metrics and support data-driven decisions.
• Worked with Microsoft Fabric to manage, transform, and model data efficiently for analytics workflows.
• Performed data cleaning, transformation, and exploratory data analysis to improve data quality and usability.

Education

New Uzbekistan University (08/24 - present)

Tashkent

Bachelor's Degree in AI and Robotics (ongoing)
Awarded a 100% merit-based scholarship for academic excellence.
Relevant coursework includes data analytics, database and network design, and programming.
Strong academic background with a high school GPA of 5.0.

Skills

- *Python (NumPy, Pandas, Matplotlib)*
- *SQL*
- *Microsoft Fabric*
- *Power BI*
- *Data Analysis*

- *Data Visualization*
- *Microsoft Excel*
- *Problem Solving*
